

MURUGAN B

Software Engineer | Full Stack Developer

+91 9597042639 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | muruganbalachandran006@gmail.com

PROFESSIONAL SUMMARY

Computer Science Engineering graduate with strong foundations in OOP, Data Structures & Algorithms, and full-stack development using Java, React.js, and Node.js. Experienced across the complete SDLC, from design and development to testing and deployment, with internship experience in software delivery and applied ML.

EDUCATION

KPR Institute of Engineering and Technology, Coimbatore, TN

B.E. - Computer Science & Engineering (AI & ML)

2022 – 2026

CGPA: 8.19

TECHNICAL SKILLS

Languages	Java, JavaScript (ES6+), TypeScript, Python
Concepts	OOP, Data Structures & Algorithms, REST APIs, SDLC
Frameworks	React.js, Next.js, Node.js, Express.js, Hono, FastAPI
Databases	MongoDB, SQL, Cloudflare D1
Tools	Git, GitHub, VS Code, Postman

PROJECTS

Gorvia | Survey Management Platform [\[GitHub\]](#)

- Built a full-stack survey platform enabling users to create, brand, publish, and analyze surveys via a dashboard.
- Implemented a multi-step survey builder with JWT auth, response analytics, and server-side pagination.
- Tech Stack:** React.js, TypeScript, Redux Toolkit, Hono, Cloudflare Workers, Cloudflare D1, JWT

Sentra | PR Risk Analysis Platform [\[GitHub\]](#)

- Built a real-time data analysis tool classifying GitHub PR diffs by risk severity using an event-driven Node.js pipeline.
- Designed an ETL-style data flow with REST APIs and webhooks, tested end-to-end using Postman.
- Tech Stack:** Next.js, TypeScript, Redux, Node.js, Express.js, MongoDB, JWT, Nodemailer

Muzly | Final-Year Project [\[GitHub\]](#)

- Built an ML pipeline for emotion-based music recommendation using CNN (FER2013) and CLIP Vision-Language Model.
- Engineered a Python FastAPI microservice with a weighted scoring pipeline processing a 300+ track dataset.
- Tech Stack:** Python, FastAPI, React.js, Node.js, MongoDB, TensorFlow, CNN, CLIP

EXPERIENCE

Web Dev Open - Software Developer Intern

Jan 2025 – Apr 2025

- Developed a full-stack MERN blog platform with JWT authentication and RESTful CRUD APIs.
- Containerized the application with Docker and collaborated in Agile sprints using Git branching strategies.

Cognifyz Technologies - Machine Learning Intern

Dec 2023 – Jan 2024

- Built rating prediction and cuisine classification models using pandas/scikit-learn, covering the full ML pipeline from data cleaning to fine-tuning and evaluation.

ACCOMPLISHMENTS

- Solved 300+ problems on LeetCode covering Data Structures, Algorithms, and problem-solving patterns.
- Achieved 6-Star rating on HackerRank in Problem Solving.
- Top 25 of 200+ teams — Intel OneAPI Gen AI Hackathon (Team DataWizards).

PUBLICATIONS

- SparseCNNet: Deep Learning Architecture for Rapid Lung Cancer Detection** — ICET14T 2025.
- Predicting Alzheimer's Disease and Mild Cognitive Impairment** — IEEE-sponsored ICC-ROBINS 2025.

CERTIFICATIONS

• GitHub — GitHub Foundations	Mar 2025	• IBM SkillsBuild — Full-Stack Web Development	Sep 2024
• NPTEL — Introduction to LLMs	Apr 2025	• Coursera — IBM Machine Learning Specialization	Oct 2023
